***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 3, 5, 9, 11, 13, 17, 19, and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Feuling in view of Arnott et al.

Feuling discloses the use of a device for the attenuation of noise in a tube intended to transport gas, comprising a branch tube having two ends of which opens into the tube by a respective connection(18), and at least one quarter wave tube(column 5, lines 45-50) having close diameters and an end which is connected to the tube at the connection point thus forming three sections of gas entering the tube (see figure 6). Feuling also discloses that his tubes can have the same diameters (column 4, lines 15-20)

Feuling does not disclose the use of a tube with a closed end.

Arnott et al discloses the use of a noise attenuator in a tube intended to transport gas, with tubes with a closed ends (column 6, lines 24-25). Arnott also discloses tubes that allow several sections of the tubes to be entered by gas (see figure 2).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the tubes as disclosed by Feuling with the closed ends as

disclosed by Arnott et al in order to provide an efficient noise attenuation system for exhaust systems.

3. Claims 2, 4, 6-8, 10, 12, 14-16, and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Any inquiry of a **general nature or relating to the status of this application or filed papers** should be directed to the **Group receptionist whose telephone number is (703) 308-0956**.

Papers related to this application may be submitted to Group 2800 by facsimile transmission. Papers should be faxed to Group 2800 via the PTO 2800 Fax Center located at Crystal Plaza 4. The faxing of such papers must conform with the notice published in the Official Gazette, 1096 O.G. 30 (November 15, 1989). The Group 2800 CP 4 Fax Center number is (703) 308-77(22 or 24). Fax numbers that provide an auto-reply fax receipt are: for before finals (703) 872-9318 and after finals (703) 872-9319.

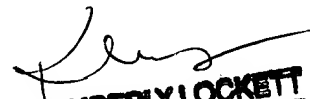

For assistance in **Patent procedure, fees or general Patent questions** calls should be directed to the **Patents Assistance Center (PAC) whose telephone number is 800-786-9199**. Assistance is also available on the Internet at [www.uspto.gov](http://www.uspto.gov).
